

## FIRMWARE UPDATE INSTRUCTIONS

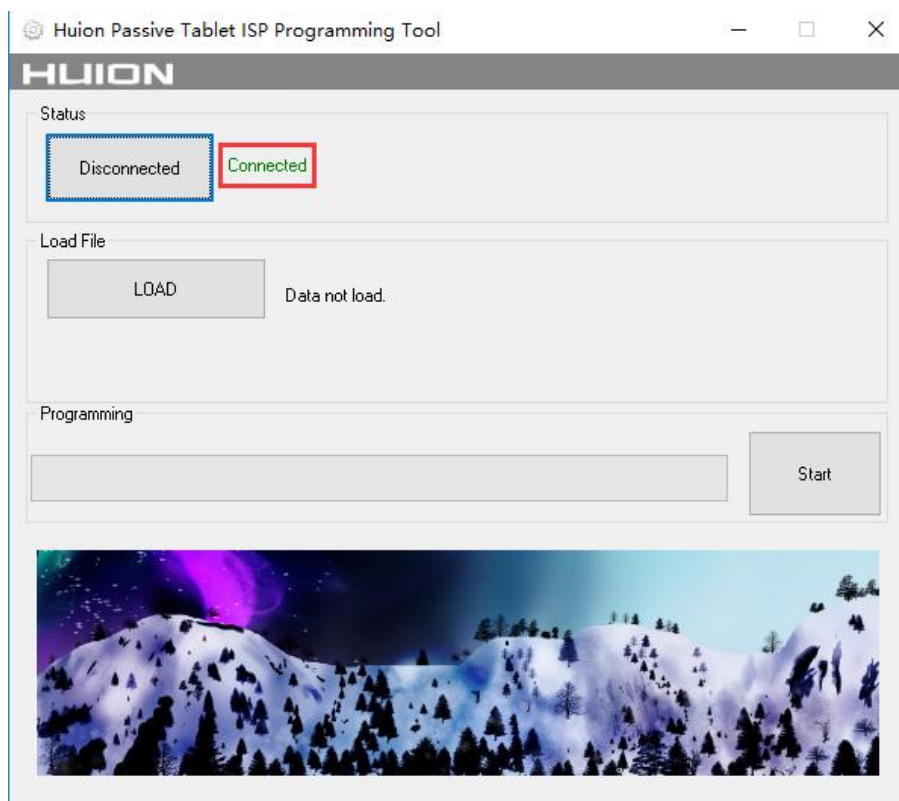

1. Make sure your operation system is Windows.
2. Make sure your tablet is disconnected from your computer.
3. Open the “Huion firmware update tool”.
4. Click “Continue” for the next step

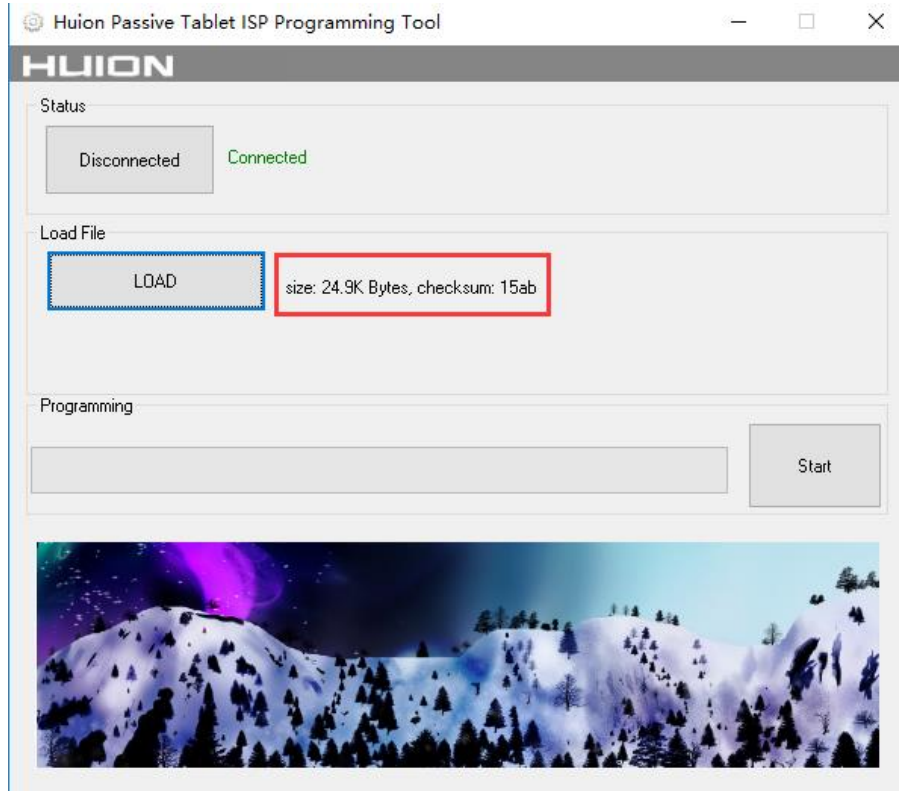

5. Click the “Connect” button, and plug your tablet’s USB cable to your computer.

6. When the computer recognizes the tablet, it will show “Connected”

7. Then click the “LOAD” button.

8. Click “Start” to program the firmware until it shows “Programming success!”. After which, re-connect the tablet.
